Coronet Turf

UK turf suppliers

Coronet Turf are nursery turf growers who supply the highest quality 'soil-less' turf grown under strictly controlled conditions which means:

- **GUARANTEED TURF SPECIFICATIONS** - tried and tested formulations used with good results over many years by commercial and amateur grass seed growers.
- **FREEDOM FROM COARSE UNSOWN WEEDS** - a better looking, more uniform and even textured appearance.
- **FREEDOM FROM PESTS AND DISEASES** - trouble free, easier to maintain to a high standard of finish.
- **LAYING TIME GREATLY REDUCED** - the c. 2.5m² (c. 3yd²) rolls save up to 30% of conventional laying times. See the '**Big Rolls**' page for 40m² cover.
- **NO WASTAGE** - because of the net and the dense root zone, the turf can be manhandled without break up. Ideal for commercial projects of soil stabilisation and river bank erosion control.
- **QUICK ESTABLISHMENT** - the speed of harvesting and delivery ensures that we supply the product in peak condition and the undamaged root structure ensures unchecked establishment. Ideal for garden lawns.
- **LIGHTWEIGHT CORONET TURF** - supplier of large c. 2.5m² (c. 3yd²) rolls in the **UK and mainland Europe**, giving reduced handling and transportation costs.
